## DETAILED ACTION

Applicant's arguments regarding claims 1-18 have been fully considered but they are moot in view of the new grounds of rejection presented in this Office Action.

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-18 are rejected under 35 U.S.C. 101 because the disclosed invention is inoperative and therefore lacks utility. Since a copy of the database description is stored within the database, the method as claimed cannot compare that copy of the database description with a description stored in the database management block without accessing said database. However, claim 1 recites "before accessing said database, comparing said copy of the said description with said description stored in said data management block".

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
